

# Coffee Creamer Snowman

**Supplies included:** Fleece fabric, Pipe cleaner, Pompoms, Orange felt, Buttons

**Other Supplies Needed:** Plastic coffee creamer bottle (clear or white), Cotton balls OR white paint (if using a clear bottle), Black marker, Scissors, Hot glue gun and glue sticks OR craft glue

**Step One:** Prepare your snowman's body by removing the label. If using a clear container, fill the bottle with cotton balls. *White paint could also be used to coat the inside of a clear container. Pour white paint into opening of bottle and tilt until all sides are coated. Add additional paint if need and let dry before putting lid back on bottle.*

**Step Two:** Cut a strip of fabric approximately one inch wide for the scarf. Wrap the material around the "neck" to gauge length needed. Allow extra length for fringe or a knot, if desired. The scarf can either be tied on or glued.

**Step Three:** Create a carrot nose by cutting a triangle out of orange felt or paper. Attach to the bottle with a small spot of glue. Using a black marker draw dots to create the snowman's eyes and mouth.

**Step Four:** Dress him up! Use buttons to decorate your snowman as you see fit. Pompoms and pipe cleaner can become earmuffs or create a hat with fabric and a pompom on top!

**Personalize!** Accessorize your snowman! Find some sticks for arms! Use extra fabric to make a hat or mittens! Add some greenery or snowflakes. We can't wait to see your snowman! Share with us on our Way Public Library Facebook page!

Happy Crafting!
