

Playing Card Necklace

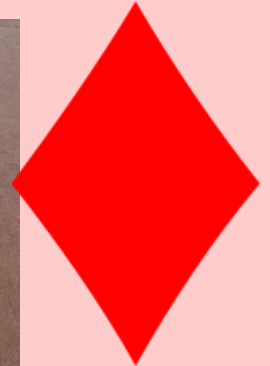

Supplies:

Drilled Jenga block Paint brush
Playing card Mod Podge
Charm Necklace
Jump rings (3) Nail file
Eye screw Pencil
Scissors

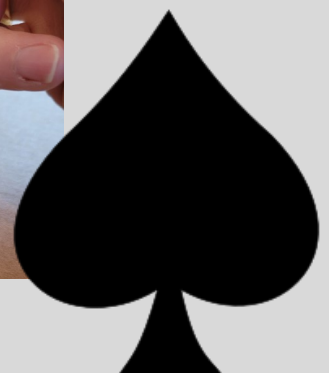

Step One: Center the front of the Jenga block over the playing card and trace a large rectangle with a pencil. Next, trace the sides of the block onto the playing card, making two narrower rectangles. Keep in mind, it will look more like a folded playing card if you keep your rectangles with the same height on their top edges.

Step Two: Cut out the rectangles. If any pencil marks are showing, simply erase them now.

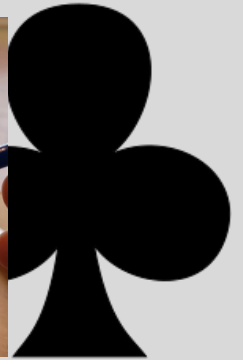

Step Three: *Tip: Screwing the eye screw into the pre-drilled hole at the top of your block now will give you something to hold while applying the Mod Podge.* Paint a thin layer of Mod Podge to the front and sides of the Jenga block. Press the corresponding playing card pieces onto the block. ***Be sure to keep them in order!***

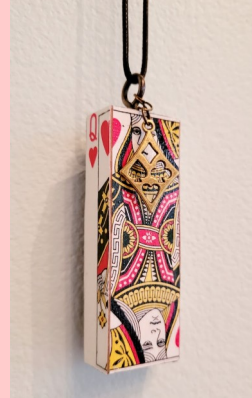

Step Four: Once dry, paint a thin layer of Mod Podge over the entire block. Seal the edges completely to prevent them from peeling up. *If you would like rough edges, use the nail file to roughen them up and give texture before sealing with Mod Podge.* Allow to dry.

Tip: If you attached the eye screw in Step Three, threading the necklace through the eye screw now allows you to hang the necklace for the Mod Podge to dry.

Step Five: Attach jump rings together, then onto the eye screw to create a chain. Add the charm to the end. Your necklace is complete!

Personalization: The options are as boundless as the playing cards in the world! Have fun with it. You can also paint the block to coordinate with your card before step three - allow the paint to dry completely before using Mod Podge. Add more charms or jazz up the card itself! Don't forget to show us your fabulous creations!

Happy Crafting
